Foodvault
Restoring Hospitality

Are you protected?

Food Vault provides the best solution for safeguarding your Point of Sale data against a range of common data loss and system failure risks including:

✓ Technical Disasters

Computer hard drive crash & failure, PC power failure, backup media degradation, system updates, service packs

✓ Human Disasters

Accidental changes or deletions, theft, disgruntled employees

✓ Natural Disasters

Fire, lightning, flood, hurricanes, tornadoes, earthquakes

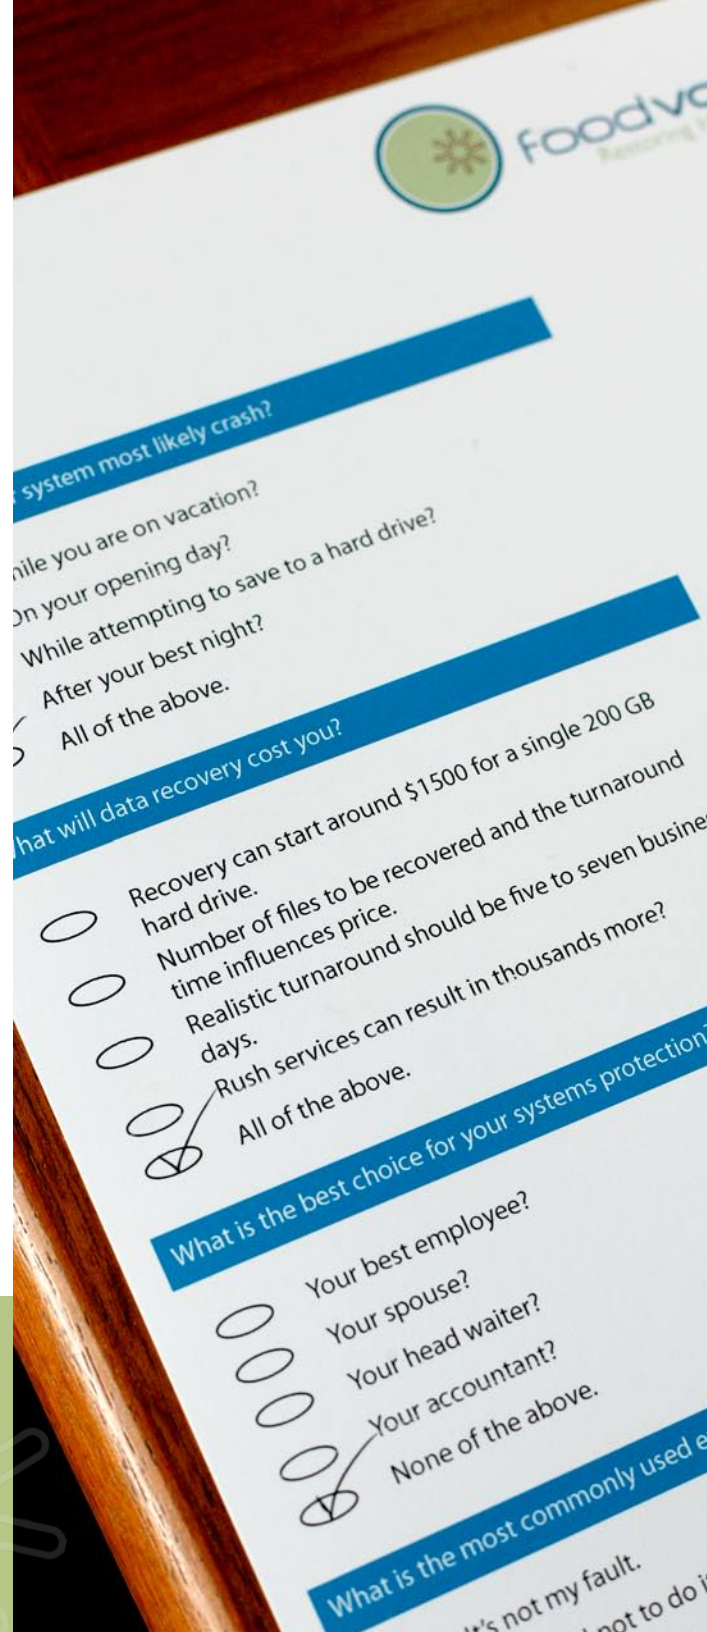

Traditional backup methods such as Tape, Zip and External Drives, CDs and DVDs, can't reliably protect your data against all these

Here to protect.

In today's fast-paced world can you rely on your employees to back up your data every night? Are you sure the correct data is being backed up every time?

Once the Food Vault client is installed, we will configure it for your particular POS software and begin backing up your data every night. Because we only back up your POS data, backups take only a few minutes even on a slow internet connection.

How much is peace-of-mind worth?

Our vault

With two data centers located in the U.S., Food Vault provides state-of-the-art infrastructure backed with complete redundancy in power, fire suppression, and network connectivity. So if for any reason we experience a disruption, your eggs are never in one basket.

What is Food Vault?

Created exclusively for the restaurant industry, Food Vault is the most cost effective, secure, and convenient way to automatically back up your Point of Sale data.

✓ It's Easy

Setup can be done over the phone. Restoring files is easy even for non-technical users.

✓ It's Secure

All backups are encrypted at 128 bit or higher. Employees cannot modify the software after setup nor delete data off Food Vault servers.

✓ It's Automated

Nightly backups run reliably with no human intervention, saves your staff time.

✓ It's Fast

Uses your current broadband internet connection.

✓ It's Always On

Our backup servers are always on but in the case you miss a backup we will notify you via email.

✓ It's Offsite

Enjoy peace of mind knowing that if the unexpected happens, your data will be safe and secure in our vault.
